

# UKG Pro Workforce Management Data Hub

Boost your business intelligence with **deep workforce management data**

Augmenting your business intelligence with workforce management data can be challenging due to limits on time and amount of employee and organizational data, impacting strategic long-term decisions.

UKG Pro Workforce Management™ Data Hub (formerly UKG Dimensions® Data Hub), our powerful enterprise-grade data warehouse (EDW) on the Google Cloud Platform (GCP), removes those barriers to provide your organization virtually unlimited access to large volumes of workforce management (WFM) data — so you can strategically analyze your WFM data with your preferred business intelligence (BI) tool and achieve better business outcomes.

### Enhanced business intelligence

Harness the power of the Google Cloud Platform and process large volumes of data with ease, allowing your organization to add WFM data for full business context in your strategic analysis.

### Workforce data your way

Use today's most popular business intelligence tools such as Microsoft Power BI, MicroStrategy, or your preferred BI tool, to analyze and model data your way.

### Strategic consulting

Partner with UKG industry experts to gain insight into industry best practices and develop trend analysis that's specially tailored for your industry.

# Key features

## For organizations

Perform strategic analysis on large volumes of data

Easily integrate with third-party data\*

Feed data into an external EDW

Scale with Data Hub for big data-type analysis

Analyze data using standard SQL

Use preferred BI tool for shaping and visualizing WFM data your way

Gain visibility into year-over-year trends and ability to create informative dashboards

View entire regions/plants/districts for extended time periods

## Flexible Data Hub options

Included with UKG Pro Workforce Management Analytics, Data Hub is available for UKG Pro Workforce Management customers in different tiers depending on your business needs. Whether you prefer to manage your own Google Cloud Platform (GCP) or have UKG manage it for you to free up resources and overhead, we're here to help.

Available options:	Great for organizations that:
UKG Data Hub Premium <sup>1</sup>	<ul style="list-style-type: none"><li>• Want UKG to manage GCP on their behalf</li><li>• Don't require third-party data</li><li>• Want to extract data to a non-GCP EDW</li></ul>
UKG Data Hub Enterprise <sup>1</sup>	<ul style="list-style-type: none"><li>• Want to join UKG Pro Workforce Management data with third-party data</li><li>• Use GCP already or require access to BigQuery via GCP Console</li><li>• Want to create their own custom views</li></ul>

\*Available with Data Hub Enterprise offerings.

<sup>1</sup>UKG Pro Workforce Management Analytics entitlement is required.
